Everywhere**
Turkey KUG

WELCOME

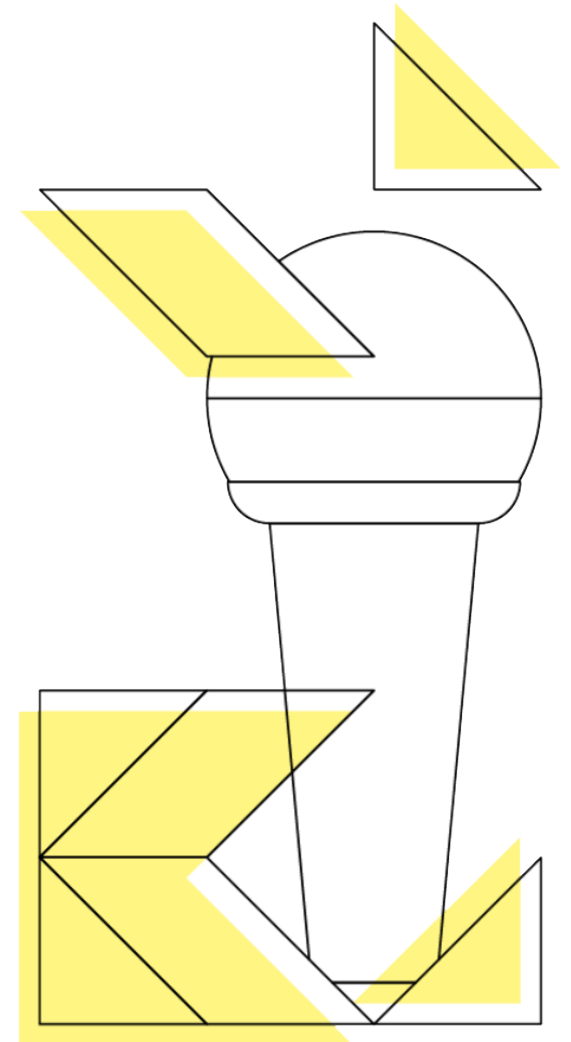

Into to Kotlin Native (Codelabs)

SPEAKER NAME

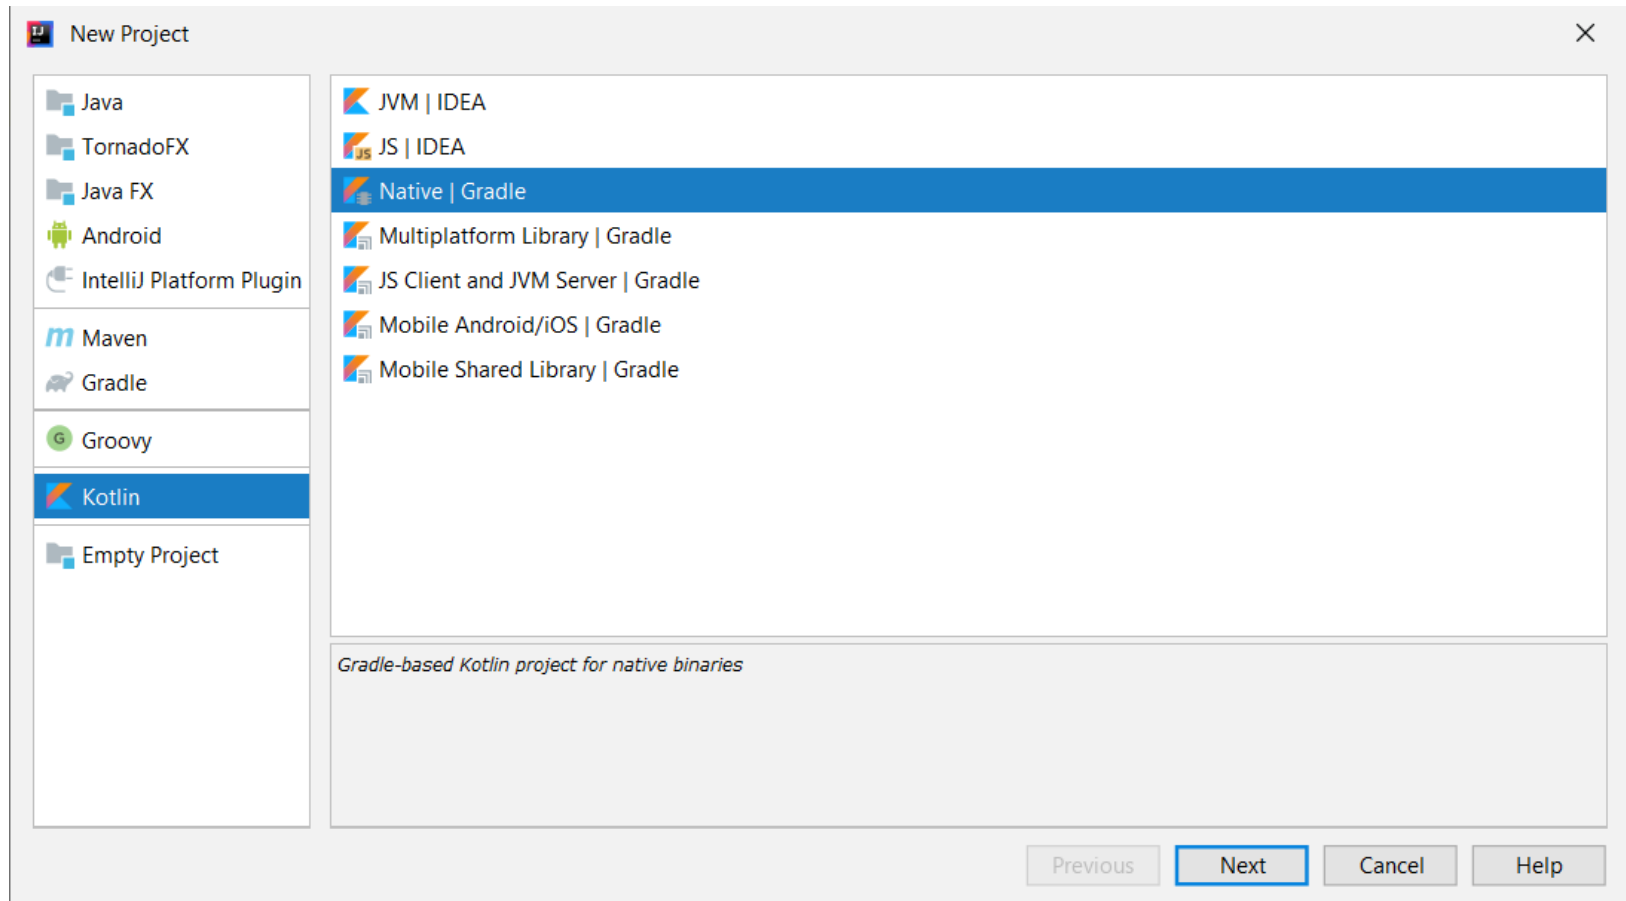

Mehmet Ali SICAK

CS Teacher, MEB

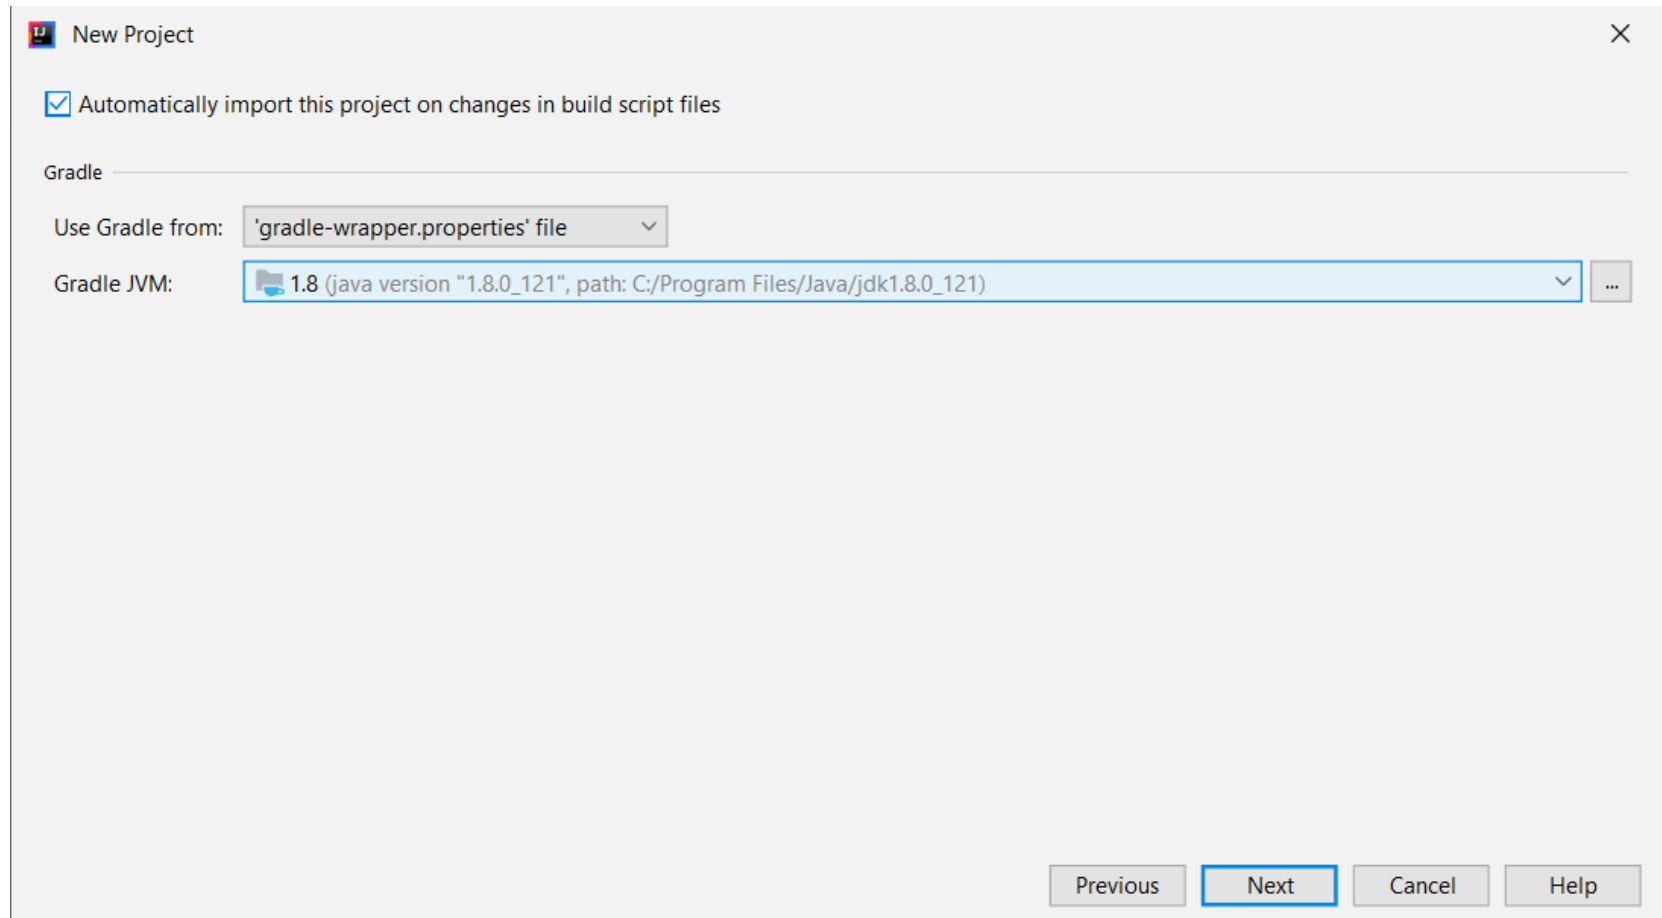

Your first Kotlin/Native project (Setting up a project)

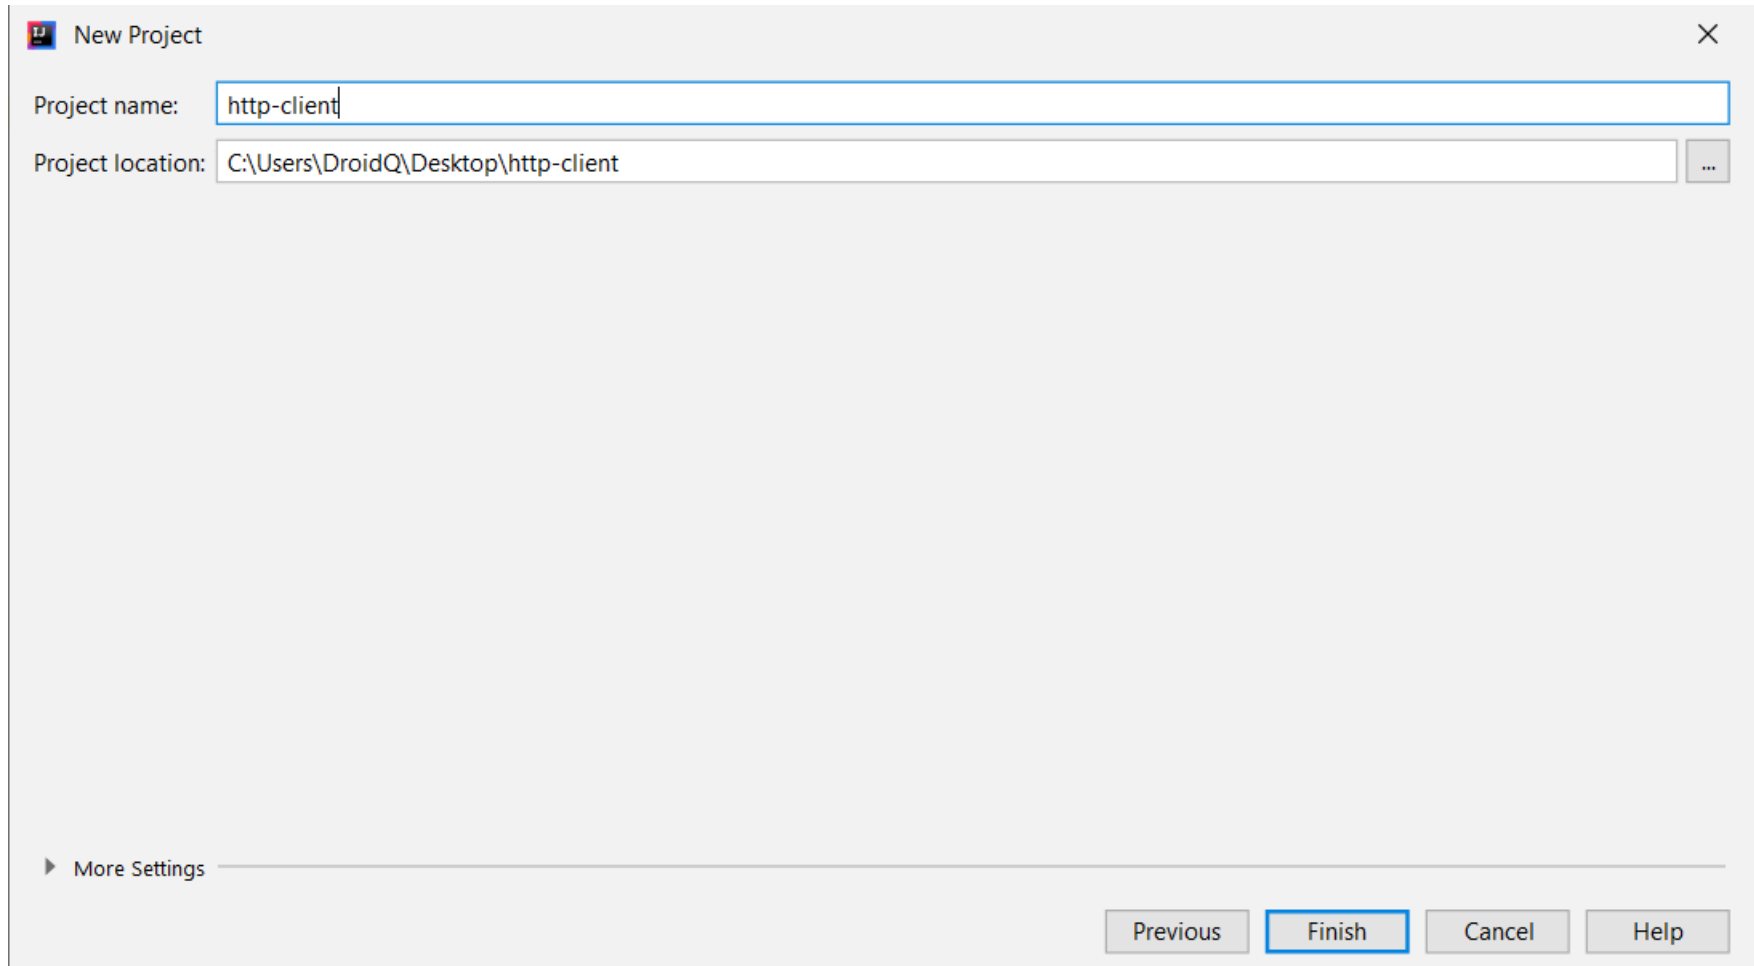

Click on File | New | Project... and select Native | Gradle from the Kotlin entry

Your first Kotlin/Native project (Setting up a project)

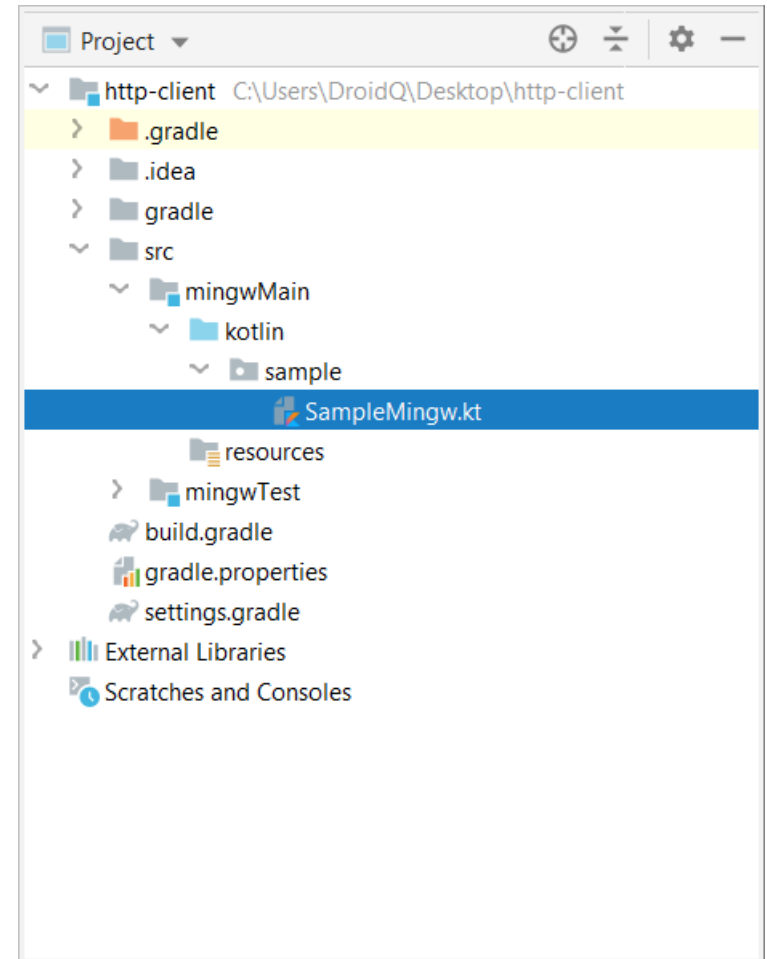

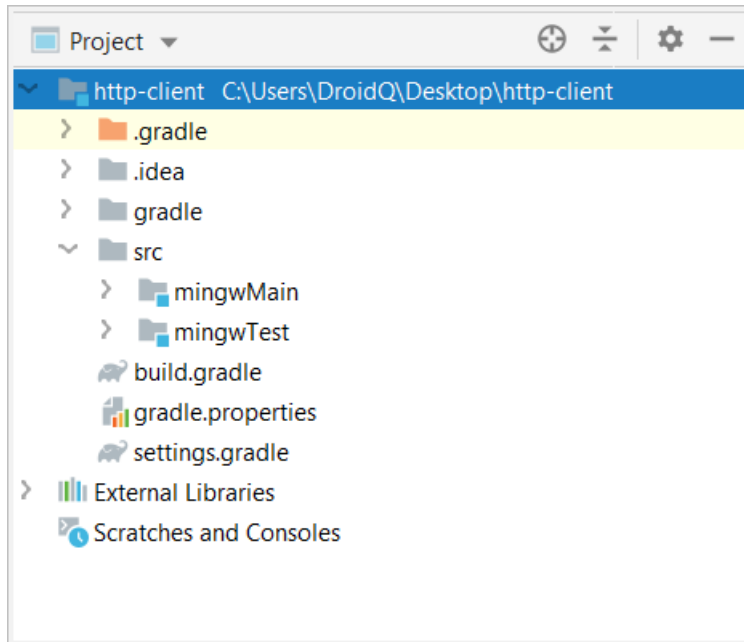

Your first Kotlin/Native project (Setting up a project)

The screenshot shows the 'New Project' dialog box with the following details:

- Project name:** http-client
- Project location:** C:\Users\DroidQ\Desktop\http-client
- Buttons:** Previous, Finish (highlighted), Cancel, Help
- More Settings:** A link to expand additional configuration options.

Project Structure

SimpleMingw.kt

```
package sample
```

```
fun hello(): String = "Hello, Kotlin/Native!"
```

```
fun main() {  
    println(hello())  
}
```

HAPPY HOUR

THANK YOU
